About me

Hey, I am web developer and developing a beautiful, responsive and optimized website is my passion. I am able to solve the coding problems and design issue, also able to write clean and structured code.

Experience

📅 Oct 2024 - Present

📅 Self-Learning & Freelancing

I am learning new stuff and working as a freelancer

📅 Apr 2022 - Oct 2024

📅 Arvaan Technolab (as Laravel Developer)

I start my journey as php laravel developer at Arvaan technolab from april 2022. In the years following I worked major projects.

- **1234text**

First time i work encrypt & decrypt logic based project. In this project user can enter key and there message for encrypt or decrypt. Encryption logic is based on combination of key and random string. I really enjoy to make this type of things.

- **SimpSi Govern**

This project is all about of user management and items management. In this project I make structured for items, project, department.. organizational level management system with permissions

- **Others**

Some others project like ArtCompass, Covid19, Equine, etc. work with teams and also worked on Rest APIs
